Serving BPA Free

Performance or safety? A premium dining experience or sustainability? With Roltex drinkware and serving products made from Tritan™ by Eastman, you no longer have to choose. Our products are developed for professional environments where performance, safety, design, and sustainability must work together seamlessly.

Tritan™ offers professional performance that matches the clarity and brilliance of glass, while being significantly lighter and far more durable. Even after thousands of uses and wash cycles, products remain crystal clear and visually appealing. Thanks to its high impact resistance, Tritan™ withstands the demands of intensive foodservice without compromising on style or elegance.

Sustainability is built into every step of our process. Roltex produces in an environmentally friendly way, and Tritan™ is fully recyclable, including through our Green Loop program. This results in a low carbon footprint and high circularity, making it a responsible choice for today and tomorrow.

Safety is just as important. Tritan™ is completely free from bisphenols such as BPA, contains no hazardous substances, and has no measurable release of microplastics. In fact, it releases fewer particles than porcelain or melamine and is fully tested and approved for food contact.

With Tritan™, practical solutions still deliver style and class. Choose designs that strengthen your brand and enhance the guest experience without compromise. Tritan™ by Eastman: developed to be better. Better than glass. Better than stainless steel. Better than all other plastics. Discover the comparison on page 120.

About Roltex

Roltex is your trusted go-to partner when it comes to durable foodservice products. With our productions in Belgium and in Sweden we excel in quality, design and innovation, all made in Europe.

When talking products, we are on a mission to become market leader in both serving trays and renewable drink- and tableware as sustainable designer products.

Together with our dealers we want to enhance the customer experience and support them with our in-house design lab where new ideas come to life. A custom renewable tumbler and a tray with your designed print communication is just a small top of the iceberg.

As service brand we focus on a durable relationship with our partners, form a team and write success stories together. We don't just sell products, we love to serve you solutions. By always thinking ahead and trying to find new and better solutions we aim to realize a top-notch experience over the entire line.

We work hard every day towards a more sustainable future, aiming to be the greenest production, using eco friendly materials and developing renewable and sustainable products.

We are here to create great experience by adding value through every process of serving food, from trays to buffets, from plates to tumblers.

And on top of all, we have a wonderful team which feels like a true family.

Roltex, we love to serve you.

BIO-POLYESTER

Dura

Introducing the Dura serving tray, made out of **bio-polyester**: it may look soft and natural, but don't let appearances deceive you—this tray combines beauty and strength. Produced with a blend of bio-polyester with glass fiber, it boasts unparalleled rigidity and a comfortable grip. With its elegant design and ergonomic construction, the Dura serves up style and quality in one attractive package.

Our Dura trays are durable and long-lasting, if treated correctly. However the material is not unbreakable. When dropped or knocked against a hard surface, the tray might chip or crack. Make sure to check if your dishwasher is adapted to this tray.

Choose your print

Make it cosy with one of our wood prints front and back or dare to be different and enhance the experience with white marble. Welcome your customers with a unique product that will serve for many years. **Would you like to add your logo? Let's get in touch!**

W Wood

Opting for a wood print on your Dura tray ensures timeless, neutral vibes that never go out of style. Elevate your dining experience with a touch of warmth and elegance, serving your meals on a platter that exudes both sophistication and durability.

- ✓ 5 years warranty against breakage
- ✓ Dishwasher safe
- ✓ Intensive use when treated correctly

FRONT & BACK

Stone S

Choose between a high-end aesthetic or an industrial vibe with our Stone collection prints. Whether you prefer the timeless elegance of White Marble or the rugged durability of Beton, our prints accentuate the product's core qualities: strength and longevity.

BIO-POLYESTER

S-Plank

Get ready to spice up your serving game with our S-Plank made in **bio-polyester**! We're talking wood, slate, marble, concrete - all combined with the reliability of polyester, like being dishwasher-friendly. Whether you're serving cold cuts at a breakfast bar or presenting snacks at a soirée, we've got you covered. Choose between a wide variety of sizes, shapes, and colors. And with our S-Cube, switching up levels is as easy as one, two, three. Be creative and let your imagination free!

Sizes 32

Prints 34

Choose your size

Elevate your platters to new heights by opting for S-Plank in the perfect format and design to complement your meals. The **MATT & STRUCTURED** surface of all our S-Plank trays enhances the product's design.

Opt for easy handling and add these bumpers/feet on your S-Plank. They will lift the platter a little from the surface, makes it easier to grab the S-Plank.

OPTIONAL

Transparent

Our transparent antislip surfaces ensure your beautiful prints shine through, whether it's one of our exclusive designs or your own creation. Rest assured, you'll achieve exceptional results.

We advise not to use light colours when adding antislip. Antislip possible on all Craft Tray sizes except for mini.

Thermoplastic

Spanning the entire range from eco-friendly to strong ABS, thermoplast trays offer many advantages. The composition of our lightweight, reusable trays varies from woodfibred plastic or PP to ABS to create an incredibly tough product, in the colour of your choice. The eco-trays also feature visible wood fibres, to add an extra touch of authenticity.

Materials

Logo & design files

Are you ready to bring out the best story on your product? Or do you want a perfect branding? Follow this checklist when sending your files to us and all will run smooth: a virtual image will be in your mailbox within 48h, free of charge. Modifications and samples are upon demand. Order quantity for personalisation might vary +/- 10% to the delivered quantity

DO'S

We prefer vector based files in pdf, eps or ai file extension.

When using fonts, please create outlines for all text.

For images we prefer high resolution files with at least 300DPI at final print size in pdf, tiff, jpg or psd.

In production we need 1 cm bleed for a perfect finish.

DON'TS

We cannot deliver high quality prints with low resolution files, Word documents with pasted images or emails with a pasted image, please always enclose your files as attachments.

When opting for antislip on your serving tray, we recommend you to use darker colour in order to avoid discoloration of your antislip.

Tray print

As for many years we are your trusted partner in personalising serving trays. We always aim for the best result possible with our in-house large format printers that match your colour the best way possible in CMYK. Also our trusted printing partner helps us out when necessary with his own specific printing technique. This way of printing is especially developed for our laminate and polyester range.

TEMPLATES
roltex.com/templates

Premium tray print

As of the beginning of 2024, we have invested in a large format printer with the widest color range on the market, featuring over 10 different colors. This means we can now offer you Premium prints on serving trays. While we already had a very good color range in our standard personalisation, we can now match your Pantone colour in the best possible way. This results in intense colours, even in challenging shades like reds, and provides stunning shadows and details. The Premium print will never disappoint you. Moreover, it is food contact approved!

Tampon print

Tampon print is the most common technique when it comes to personalisation on drinkware. When personalising tumblers you create an extra vibe in branding your spirits and sodas. This type of print is mainly used in a max. circle of 60% of the glass' diameter and should be 1 cm away from the rim. Multi-colour print possible.

Engravement

When looking for an original and long lasting logo print, we love to serve you: engravement. Our laser loves to make the greatest designs so don't be shy trying something completely different. Engravement works beautifully on our drinkware, Paturl and ABS trays. Single colour and eps file required.

In mould label

Abbreviation known as IML, this technique promises you everlasting resistance on our thermoplast trays PP Small and ABS with handles. Our labels are added while the product is being injection moulded. Great results and food contact approved, however high quantities required (2500 pieces) so don't hesitate contacting us for more information.

FROSTI

Improved pouring & stacking, all in Tritan.

After years of success with our Frost range, we've upgraded the design based on customer feedback with following:

- Improved 'frost' look ⁽¹⁾
- Longer spout for better pouring ⁽²⁾
- More compact stacking ⁽³⁾
- Stackable with lid on ⁽⁴⁾
- Thumb fits in handle pitcher for easy pouring ⁽⁵⁾
- Longer handle and extra ribs between handle and pitcher improve resistance ⁽⁶⁾
- Compatible in Green Loop

FROZZY PACK

Keep food cold and fresh - all day!

Frozy Pack is a practical lunchbox designed to keep your food fresh and cool throughout the day. Its integrated cooling lid maintains a low temperature for up to 7 hours at room temperature, without the need for extra ice packs or cooler bags. Simply place the lid in the freezer for at least 10 hours, then pack your meal and go.

Ideal for school, work, the beach, or picnics, it makes bringing your own food simple and convenient. Bonus: place your drink next to it and keep it cool as well.

Frozy Pack is dishwasher safe, easy to use, and made in Sweden from materials free from BPA, PFOA and parabens.

Smart lid with built-in cooling pack for the 0,9 L and the 1,2 L Frozy Pack

Cutlery

An easy-to-handle fork, knife and spoon are essential for a pleasant meal. Goodbye to plastic cutlery that breaks on the third bite, hello the unbreakable alternative. Our reusable forks, knives and spoons run the gamut from standard to colourful: alternatives are available for children and adults. Even the smallest teaspoon.

Small Serving Tong

Material PA
L x W 18 x 3 cm
Weight 22 g

Pieces / box 300
Ref. ALO.088127

Serving Tong

Material PA66
L x W 24 x 3,5 cm
Weight 60 g

Pieces / box 150
Ref. ALO.081117

Frying Tong

Material PA66
L x W 28,5 x 4 cm
Weight 84 g

Pieces / box 112
Ref. ALO.083807

Kitchen Tweezer

Material PA66
L x W 27 x 1,1 cm
Weight 30 g

Pieces / box 250
Ref. ALO.088117

Combi Serving Tong

Material PA66
L x W 31 x 7 cm
Weight 77 g

Pieces / box 160
Ref. ALO.COMB-B

Serving Tong

Material Tritan
L x W 22,5 x 8,7 cm
Weight 84 g

Pieces / box 10
Ref. HAC.556BLA

S-Plank

Material Bio polyester
L x W x H See p. 32-33
Weight See p. 32-33

Pieces / box 5 - 10
Ref. SPB

Available in 7 colours see p. 34-35

S-Cube

Material HDPE
L x W x H 5 x 5 x 6 cm
Weight 43 g

Pieces / box 24
Ref. IMO.032500

Choose your S-Plank on p. 30-35

Bumpon

Material PU
W x H 1,9 x 0,4 cm
Weight 1 g

Pieces / box 4
Ref. IMO.830004

Build your buffet

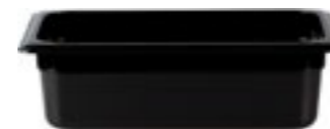

This revolutionary product takes us back to our childhood; building blocks. Put 4 S-Cubes on your table and finish them with our S-Plank to create new display solutions for your buffets. Combine different heights with different S-Plank dimensions and let your imagination run free. This HDPE material has a matt, soft touch finish and is perfectly dishwasher safe. Let's start building.

The bumpons are offered to add on the back of your S-Plank in order to lift them a little bit from the surface.

Food containers

Keep your kitchen and buffet practical and wellorganised. Thanks to a wide range of fresh food containers in all sizes and, if required, with lids, tidiness is always a close companion. Optimum user comfort.

Developed with design in mind

Serving sustainability

Green Loop

Introducing the revolutionary Green Loop System – a shift in sustainability and business efficiency! Say goodbye to the traditional cycle of purchase, use, and discard. With our circular model, your business flourishes while leading the charge in environmental responsibility like never before.

Experience the difference with our industry-unique approach, using the power of bioplastics to achieve environmental benefits. Unlike conventional products, our Green Loop System ensures that every resource is utilised to its fullest potential, delivering not just products but a complete sustainable solution.

We're not just offering products; we're offering a transformational journey towards a greener future. Backed by facts and certifications, our system is the fastest route to CO₂ savings, making every decision a step towards a cleaner planet.

Join us in creating the world we want to live in and leave behind. From plates to canteens, chopping boards, and beyond, our system redefines the possibilities of recycling and reuse. Unlike fragile alternatives, our plastic products are engineered for durability, ensuring quality remains uncompromised through countless cycles of use.

And the benefits don't stop there. With lower energy consumption at every stage of production and reduced weight for transportation, our system minimizes CO₂ emissions, making every product not just environmentally friendly, but economically too.

Elevate your business, empower the planet – embrace the Green Loop System today! **Contact our sales team for more information.**

roltex[®]

A product innovation with sustainable benefits for food service professionals

Performance or safety? Dining experience or sustainability? Don't compromise in your choice with Roltex glassware and serving products made from Tritan by Eastman.

✓ Professional performance

As clear as glass (but lighter!) and just as brilliant after thousands of uses and wash cycles. High impact resistance without compromising on style.

✓ High sustainability

Our production is environmentally friendly, and Tritan can be recycled – including as part of our Green Loop program. This means a low carbon footprint and high circularity.

✓ High safety

Safe Tritan is completely free from bisphenols such as BPA. The material has no measurable release of microplastics and releases fewer particles than porcelain and melamine. Naturally, it is tested and approved for contact with food!

✓ Design and quality

With Tritan, practical still means style and class. Find the products that match your brand and enhance the guest experience without compromise.

Tritan, a copolyester from the Eastman Chemical Company, is a Poly Cyclohexylenedimethylene Terephthalate Glyco (PCTG), made without using any bisphenols or phthalates. PCTG is a modified version of PCT with added glycol, which improves its mechanical properties and processing characteristics. Its chemical structure is similar to that of polyethylene terephthalate (PET), with which it shares properties like dimensional stability and chemical resistance. In short, PCTG is a modified copolyester (PET).

Roltex products are mostly stamped with several markings to ensure traceability. Firstly, we have the ROLTEX or MALKO brand names. Secondly, food contact symbols (the glass and fork) and thirdly a recycling triangle. Since there have been so many wrong conceptions regarding the interpretation of the recycling triangle's numbering, we have chosen not to add a number in the triangle. PCTG would belong to group 7 together with a vast number of different plastics. Forth, date clock that will enable us to see the production month and trace the material batch. Fifth, a material marking. In many cases we use an arrow marker to be able to run the molds in different materials. For the products made from Tritan, the marking will be PET.

Tritan from Eastman – developed to be better

Better than glass. Better than stainless steel.
Better than all other plastics.

Benefits

for you and your staff:

- Low cost and long service life.
- Practical: lightweight, stain-resistant, scratch-resistant.
- Virtually unbreakable – no sharp shards.

for your guests:

- Glass-like clarity and stylish design.
- No unpleasant odor or taste.
- Safe, secure, and sustainable material.

for the planet:

- Less waste than from disposable cups, etc.
- Recyclable = high circularity.
- No hazardous substances or measurable microplastics.

Advantages of Tritan compared to other common plastics and glass*

Material	Cost per use	Dishwasher durability	Impact resistance	Chemical resistance	Scratch resistance	Stain and odor resistance	Safety (no hazardous substances)	Color and transparency
